

Evaluation form - Internship at TAF- The Animal Fund

- Name: Lucy Davis
- University: Sciencespo
- Period of Internship: November 2020– Maj 2021
- Hours of Internship : 57
- Tasks given : Support for European waste week, beach cleanup with nature 2000, school education in Nice, social media for TAF
- Tasks completed : All
- What did you like the most about your internship:

I loved teaching the young students in Nice. They were super excited to learn about whales and dolphins and I'm really glad I was a part of it.

- Did your internship live up to your expectations?

Yes, absolutely.

- Can you recommend others to apply to TAF?

Yes, in fact several first-year Sciences Po students have asked me about internships in the environmental sphere and I have recommended TAF to them.

- Which skills did you learn?

I learned much more about the problems facing the oceans and cetaceans, and I improved my graphic design and social media skills. I also learned many great life lessons from Berit.

- Can your internship and what you learned be of use for you in the future?

Yes, I'm sure I will put all of these skills to use in the future, either in my career or just in my life.

- Other comments:

I'm so grateful to have had this opportunity to intern and support TAF's mission.
