

*“Volunteering for TAF is an experience that gives emotions and life lessons. First of all you get the chance to help and support your local community, working together for the environment and raising awareness on how we can improve the world we live in.*

*In addition to that, you get to learn many things on our oceans and on the life beneath it.*

*Finally and probably most importantly, through TAF community you have the chance to meet really wonderful people, and build lifetime friendships. Thank you Berit for welcoming me into your big family.”*
