

Maycka DELGADO Testimonial

As a proud volunteer with TAF, The Animal Fund, since 2018, I have seen firsthand the impactful work of this association in protecting our oceans. TAF is a dedicated, multicultural community united by a common goal: saving marine ecosystems. Through education and campaigns targeting single-use plastics, TAF addresses critical issues such as rising ocean temperatures and the impact of shipping on marine life.

In a world where the health of our oceans is under constant threat, TAF, The Animal Fund, is a beacon of hope. Positive change is not only possible but achievable, thanks to TAF's commitment and the collective efforts of individuals, consumers, citizens, and civil society. I feel that my contribution, even if it is a small grain of sand in this world, has made an impact on this society.

TAF's holistic approach encourages responsible consumer behaviour and advocates for systemic change. As a volunteer in their awareness campaigns for children and adults, I am privileged to be part of a collective effort that emphasises collaboration, education and a shared commitment to the future of our planet.
